JADEWIN AN 9614

ANTIOXIDANT

CHEMICAL COMPONENT

CAS	2408518-51-2/2408520-66-9
M.W	1000 ca.

SPECIFICATION AND PHYSICAL PROPERTIES

TEST	UNIT	SPECIFICATION
APPEARANCE		LIGHT YELLOW TRANSPARENT LIQUID
COLOR(APHA)		<200
REFRACTIVE INDEX(25℃)	%	1.5400-1.5500
SPECIFIC GRAVITY(25℃)		1.070-1.110

FEATURE AND APPLICATION

- JADEWIN AN 9614 is an environmentally friendly, phenol-free liquid phosphite product with excellent hydrolysis resistance compared to conventional phosphite antioxidants, and excellent resistance to industrial exhaust gases.
- JADEWIN AN 9614 is suitable for polar materials such as polyurethanes and polyamides and has both antioxidant and flame retardant properties.
- JADEWIN AN 9614 has excellent high temperature resistance to thermal decomposition and heat discoloration.

Recommended additives: 0.1-4.0%.

PACKING

25KG PLASTIC DRUM

STORAGE

Keep container tightly closed and dry and storage in cool place
